

Sequence processing

In the sequence processing window, they are gradually led by the generation of barcodes or based on a self-controlled sequence. Please open the sequence processing window with CMD-5 or by calling the menu file > sequence.

The screenshot shows a macOS-style window titled 'Sequence processing' with a dark gray background. It is divided into five main sections:

- 1. Barcode typ auswählen**: A dropdown menu showing 'EAN13'.
- 2. Ausgabeordner auswählen**: A button labeled 'Ordner wählen'.
- 3. Dateiformat wählen**: A dropdown menu showing 'PNG'.
- 4. Einstellungen**:
 - A text field showing the path '/Users/thomas/Desktop/Barcodes'.
 - Padding**: A slider bar.
 - ☐ Ruhezone in Padding enthalten
 - ☒ Inklusive <>, sofern passend
 - ☒ Textbeschriftung einfügen
 - Strichstärke**: A slider bar.
 - Strichfarbe**: A black color swatch.
 - Hintergrund**: A white color swatch.
- 5. Sequenzeinstellungen**:
 - Startwert**: Text field with '123456789012'.
 - Anzahl**: Text field with '10'.
 - Erhöhung um**: Text field with '3'.
 - Format**: Text field with '\$\$\$\$\$\$\$\$\$\$'.
 - Sequenz**: A button labeled 'Erstellen'.
 - A list box showing the generated sequence:
 - 123456789012
 - 123456789015
 - 123456789018
 - 123456789021
 - 123456789024
 - 123456789027
 - 123456789030
 - 123456789033
 - 123456789036
 - 123456789039

At the bottom, there is a checkbox ☐ 'Im Archiv speichern', a button 'Abbrechen', and a blue button 'Ausführen'.

Then step by step:

1. Select barcode type Select what type of barcode should be created by selecting the right entry from the list. The settings are shown to you.

2. Select output folder, please determine where the barcodes generated should be secured. This can be an existing or a newly created folder.
3. Select file format, determine which format the barcodes should be saved. The four supported formats SVG, JPG, PDF and PNG are available to choose from.
4. Settings please set the settings for the barcode or QR code. You can find explanations on the setting options in the description of the main window.
5. Squerus settings Please enter the desired information in the fields **Start value**, **Number**, **increment** and **Format** (or leave the default values). By clicking on the key **Create** the list of the list of Barcodes created in the preview text field.

Finally, you can still determine whether the newly created barcodes should be saved in the archive.

The execution then creates the barcodes.
